EXPERIENCES

Full-Stack Engineer **September 2026 - Present**
Thorne Consulting | Part-time *Houston, Texas, United States*

- Contributed to MyThorneAI, an AI-powered Career development and Educational platform, built as a distributed system comprising a containerized Next.js web application, Fastify authentication service, Mastra/Inngest AI orchestration service, and FastAPI voice processing service.
- Led end-to-end development of “Day in the Life,” an immersive work simulation featuring an interactive desktop simulator, dynamic NPC interactions, Jev-based objective validation, and LLM-driven, evidence-based rubric scoring.
- Built the "Day in the Life" scenario generation pipeline combining reusable workday templates and predefined companies and NPCs with LLM-generated objectives, tasks, and desktop content.

Full-Stack Engineer **March 2026 - Present**
PioneerDev AI | Contractual *Boulder, Colorado, United States*

- Contributed to Promptwise, an AI creative platform for image, video, and audio generation, built on a multi-provider fallback architecture spanning direct and third-party model providers, with long-running generation workflows orchestrated through Trigger.dev.
- Led development of Influencers Studio, enabling customizable AI influencer avatars, reference-based image and video generation for visual consistency, and LLM-powered social media captions, built on top of existing multi-provider generation architecture.
- Developed the user-facing and administrative features of MarrylyMatch, a matchmaking platform built with React Router and Fastify, including authentication with phone verification, curated profile galleries, GoHighLevel date scheduling, and the marketing website.
- Built SEO-optimized websites with Astro and Cloudflare, instrumented user behavior with Amplitude to inform product improvements, and integrated Sentry error monitoring with Grafana Loki structured logs for debugging.

Full-Stack Developer **May 2025 - February 2026**
AppQuant Technologies Inc. | Full-time *Pasig, Philippines*

- Owned end-to-end architecture and development of Superproxy (now Moonbreak), a SaaS CRM for managing leads and companies, building quotations and invoices from reusable templates, and emailing and sharing documents with clients.
- Developed an LLM-powered sales assistant with tool calling to retrieve and update CRM records and draft emails, using Redis-backed conversation memory to preserve context.
- Implemented Stripe subscriptions and prepaid credits shared across AI calls and chatbot usage, with webhook-driven balance updates and automatic usage deductions.
- Implemented multi-organization authentication and role-based authorization with Supabase Auth, enforcing tenant isolation through backend REST API checks and database Row-Level Security (RLS).

SKILLS

Languages: TypeScript, JavaScript, Python, PostgreSQL

Frontend: Next.js, React, Astro, HTML, CSS, Tailwind CSS, Shadcn UI, TanStack, Zustand

Backend: Next.js, NestJS, Fastify, FastAPI, Node.js, Prisma, Supabase, Redis, AI, Asynchronous Jobs

DevOps & Infra: Cloudflare, Fly.io, GCP, Docker, GitHub Actions, Sentry, BetterStack, Infisical

EDUCATION

Bachelor of Science in Computer Science **September 2021 - August 2025**
Bataan Peninsula State University – Main Campus *Bataan, Philippines*
