## EXPERIENCES

---

### Full-Stack Engineer

*PioneerDev AI*

**March 2026 – Present**

*Colorado, United States*

- Developed an Influencer Studio generating influencer avatars, images, videos, and audios within an AI Creative Platform using Next.js, Prisma, tRPC, NeonDB, Cloudflare, and multiple AI providers.
- Integrated third-party and direct AI providers for an AI Creative Platform, including FAL AI, KIE, Google Gemini, Kling, Seedance, and ElevenLabs, with fallback provider chain and adapter pattern.
- Managed long-running AI generation workflows with Trigger.dev, including queues, retries, failure recovery, polling, real-time progress, and state reconciliation.
- Improved application reliability and observability using Sentry for error monitoring, LangFuse for LLM observability and cost tracking, Grafana for system monitoring, and Amplitude for user behavior analytics.
- Developed a Matchmaking Platform using React Router, Fastify, and Fly.io, with profile ranking, an admin dashboard, and automated profile ingestion and reconciliation from partner dating platforms.
- Built fast, SEO-optimized marketing sites with Astro, improving Lighthouse scores and Core Web Vitals, and implementing analytics instrumentation with GTM, GA4, Meta Pixel, and Contentsquare.
- Collaborated with designers, project managers, and engineers in cross-functional teams, using Linear to plan, track, and deliver features from development through release.

### Full-Stack Developer

*AppQuant Technologies Inc.*

**May 2025 – February 2026**

*Pasig, Philippines*

- Independently designed, built, and maintained a Multi-tenant AI-powered CRM using Next.js, TypeScript, Prisma, Supabase, Vercel, and ElevenLabs.
- Owned end-to-end architecture across React components, REST APIs, database schemas, authentication and authorization, third-party integrations, and deployment.
- Designed Prisma schemas and models for a multi-tenant CRM, including relationships, migrations, constraints, query optimization, indexes, and row level security on Supabase.
- Built backend REST APIs with request validation, rate limiting, error handling, and integrations with external services such as Resend, Twilio, ElevenLabs, and OpenAI.
- Integrated Stripe for payment workflows, creating webhook events, idempotent event processing, payment state updates, and reconciliation with application records.
- Integrated Twilio and ElevenLabs for building Voice Agents, handling asynchronous and automated sales calls, prompt engineering, and custom voice creation via Voice Cloning.
- Debugged production issues across frontend, backend, database, and third-party integrations while maintaining reliable releases through Vercel.

## SKILLS

---

**Languages:** TypeScript, JavaScript, PostgreSQL

**Frontend:** React, Next.js, Astro, React Router, HTML, CSS, Tailwind CSS, Shadcn UI, TanStack, Zustand

**Backend:** Next.js, Fastify, Express.js, Node.js, Prisma, Supabase, Redis, RBAC, REST API, tRPC

**DevOps & Infra:** Docker, GitHub Actions, Expo, Vercel, Cloudflare, Fly.io Infisical, Sentry

**Tools & AI:** Git, Claude Code, Codex, MCP, Figma, Linear, Postman

## EDUCATION

---

**Bachelor of Science in Computer Science**

*Bataan Peninsula State University – Main Campus*

**September 2021 – August 2025**

*Bataan, Philippines*
